

**AKZ Ltd. Matrozu iela 15, LV-1048, Riga, Latvia.**

European Union Timber Regulation 995/2010 (EUTR)

Policy Statement 1<sup>st</sup> January 2014

AKZ is a privately owned company operating a large modern sawmill at Aizkraukle, Latvia. AKZ is an Operator as defined under EUTR rules. The production is fully certified under FSC and PEFC chain of custody schemes.

AKZ produce a range of softwood products including structural timber, decking, slating battens and CLS all manufactured from European Redwood (Pinus Sylvestris) or European Whitewood (Picea Abies).

The majority of raw material is purchased from Latvian forests with some imported from neighbouring countries.

To comply with the FSC and PEFC certification schemes and now additionally to comply with EUTR, AKZ run a robust, documented system of due diligence through the whole supply chain. This provides full traceability of product back to forest concession, ensuring no illegal timber enters the supply chain and all raw materials are from legitimate sources as defined under EUTR.
